

**Neasden Primary School**  
**EYFS:**

Literacy	In Literacy we will be focusing on a selection of farmyard texts such as “What the Ladybird Heard”, “The Little Red hen” and “Farmer Duck”. This term we will cover story sequencing, information texts, traditional tales and poetry. A selection of activities the children will partake in are: talk for writing, creating their own animal fact files and producing simple rhymes about farm animals.
Numeracy	Throughout this term we will be following our Mathematics long term plan which includes counting, recognising and ordering numbers to 20, doubling and halving, one more/less, addition and subtraction. Wherever possible numeracy activities and experiences will be linked to the current topic.
Science	Following on from “The Little Red Hen” the children will have the opportunity to bake their own bread, so we will be discovering the process from ‘farm to fork’. We will look at animals and their young and discover what products we get from different farm animals. The children will also be comparing farming lifestyles and machinery now and in the past.
Geography	
History	
ICT	Children will use technology to enhance their learning such as using iPads to photograph, record sounds and document their learning. We will also be teaching the children to become confident and competent in using ICT equipment within the classroom.
Art	Lots of art and DT activities will be on offer. These will be linked to our current topic such as: creating junk modelling farms, printing with farm foods and painting with mud. We will also use musical instruments to bring stories to life and sing a variety of songs themed around our topic. For example, ‘dingle dangle scarecrow’ and ‘Old McDonald Had a Farm’. The children will be baking their own bread as well as building farming machinery with the construction equipment.
Design and Technology	
P.E	The children have the opportunity to explore our outdoor area on a daily basis and use the outdoor equipment such as bikes, scooters and tyres to improve their gross motor skills as well as improve their special awareness. We will also be taking part in weekly PE sessions to help develop their physical and self-care skills.
